25 YEARS OF INNOVATION

About ConSet and ergonomics

Ergonomics, Reliability & Innovation – The ConSet Standard

ConSet is a Scandinavian manufacturer of electric height-adjustable desks, celebrating 25 years of innovation.
Our products are designed to enhance efficiency, health, and comfort in the workplace, a commitment that defines the foundation of ConSet.

Since delivering our first electric desk in 2000, we have been pioneers in height-adjustable work-spaces.

Over the years, we have continuously refined our products through extensive development and production improvements, expanding our range while staying true to our core principles: rigorous testing, reliability, value for money, and choice.

Our new catalogue presents the widest range of frame options we have ever offered, with each series designed for a specific ergonomic purpose. Smaller tables are available in larger selections, and paradoxically, it also applies to larger ones that are suitable for many screens.

In the professional office furniture sector, reliability and repeat orders are essential, and securing customer confidence remains a top priority at ConSet.

Find Your Perfect Desk

Scan the QR code or visit consetaustralia.com.au and click 'Height Calculator' to find the perfect desk for your height. The 'ConSet Height Calculator' recommends the ideal sitting and standing height based on gender, height, and footwear, and suggests the best ConSet desk to match.

For very tall or very small individuals, multi-user setups, or desks shared by adults and children, finding the right fit can be challenging. In these cases, the height calculator is an invaluable tool.

But remember — the best height is the next height!
Alternate between sitting and standing to stay active and get the most out of your desk and day.

LCA and Carbon footprint

Sustainability in Numbers, Not Just Words

The green transition is a reality, and manufacturers have a responsibility.
As an engineer-driven company, ConSet makes rational choices based on data to actively drive sustainability in our operations.

To ensure transparency, ConSet has performed a Life Cycle Assessment (LCA), reviewed by TÜV under EN 14040, EN 14044, and EN 14071 standards. This analysis measures the full environmental impact of our products, from raw materials to end-of-life disposal.

We publish CO2 data for every product on our website, making sustainability reporting easier for businesses. While a secondhand fixed desk may have the lowest CO2 impact, it is not a practical solution for a modern, ergonomic workspace—where 60-90% of people experience back pain in their lifetime.

Electronics significantly impact CO2 emissions, which is why simplicity and efficiency are core to our designs. Fewer components mean greater reliability while reducing environmental impact. Our approach ensures that every product has a measurable and concrete CO2 value, making sustainability decisions clear and transparent.

Price and other supply factors still exist but inside all our priorities is how a product affects emissions with a concrete calculated number so that it is easier to explain than a lot of words.

Scan the QR code and read more about the results from LCA
or visit www.consetaustralia.com.au.

Elevating Excellence | ConSet
501-9

501-9 | Slim and Stable

At ConSet, we designed our first small height-adjustable pedestal desk 25 years ago, and we quickly learned that creating a slim, single-column desk that remains strong and stable demands precision.

With the 501-9, we've perfected the balance between sleek design and rock-solid stability.

The 501-9 is available in two configurations:

• Wall-mounted – A smart, space-saving solution.

• Freestanding – Designed with a sturdy base.

The freestanding model can be equipped with wheels or a rechargeable battery, ensuring total mobility—so your ergonomic workstation not only moves up and down, but from room to room.

501-19 | Versatile frame

The 501-19 series offers a range of strong height-adjustable desks, designed to maximise flexibility and functionality.

501-19 Center (A) – Strong and compact with a symmetrical design, providing access from all sides and compatibility with smaller tabletops.

501-19 Basic (B) – Ideal for group setups, supporting up to 80 kg and various tabletop sizes.

501-19 Design (C) – Features a sleek crescent-shaped base, perfect for stylish and functional group arrangements.

501-19 Wall (D) – A space-saving solution, with options for multiple units to lift wall-mounted benches.

Enjoy complete flexibility by adding wheels and a rechargeable battery pack.

Elevating Excellence | ConSet
501-20

501-20 | Nothing Excessive

A work desk that delivers exactly what you need—nothing more, nothing less.

The 501-20 is ConSet's first desk with slim profiles, carefully balancing minimalism and stability. The desk travels from 680 mm to 1190 mm and has a load capacity of 60 kg.

Materials are reduced to essentials, using only recyclable and reusable components to lower CO2 emissions. This philosophy extends to transport and packaging, ensuring a more sustainable solution. The legset is delivered in a compact box, that only weighs 14 kg.

The first ConSet desk fully designed to minimize its carbon footprint, the 501-20 proves that sustainability does not exclude quality, durability, and great ergonomics

The 501-20 is ConSet's contribution to Nordic minimalism.

Explore our full range and find more details about this product at www.consetaustralia.com.au

501-23 | Strong and Stylish

Lifting up to 175 kg, the 501-23 delivers stability and durability with a sleek, elegant design.
The centred base maximises legroom on both sides while ensuring balance without added bulk. It also includes an integrated cable tray for a neat, organised setup.

Flexible configurations to suit any need:

• Wall-mounted – Synchronise up to 3 columns.

• 3-leg L-shape – Perfect for large workspaces.

• 2-leg design – A simple, popular solution.

Columns can be arranged in unique formations—limited only by imagination.

Sleek, durable, and designed to impress.

Elevating Excellence | ConSet
501-33

501-33 | Efficient by Design

The height difference between the tallest and shortest person in the world is significant. Ideally, a single desk would suit everyone, both sitting and standing. While this is technically possible, achieving it would require excessive materials and costs.

We are all familiar with the 80/20 rule, it is the one expressed in EN 527-1,TYPE D. The standard defines the dimensions of a sit/stand desk suitable for 80% of the adult European population.

501-33 is built for professionals who value smart design, and who have the 80/20 mindset. It assembles quickly due to its three large modular components and offers straightforward operation and reliability. This desk will effortlessly become a part of everyday work life and is built to last for years to come.

A practical choice for those who demand efficiency and durability.

Elevating Excellence | ConSet
501-37

501-37 | Ergonomics for All

With a height range of 570 to 1220 mm, this desk is ideal for users who don't fit standard office furniture—including children.
It suits individuals from 1440 mm in height, whether seated or standing, and supports tabletops as shallow as 600 mm.

The low height also means that the desk is great to be used with wheels, as it does not become too high for sitting with wheels.

The table is available with 3 columns, either for L-configurations or a multi-screen setup. Professional-use areas also show that the table is of well-tested quality.
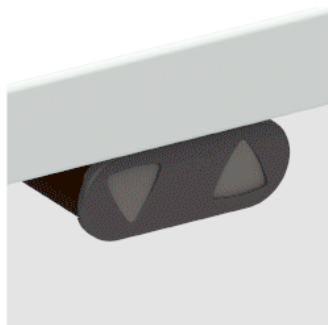

Explore our full range and find more details about this product at www.consetaustralia.com.au

501-43 | Premium Quality

A table series that is available both as a regular desk and as a large corner table.

The height travel is 680 mm and it moves from 620 to 1300mm. The tables in the series can lift 100kg. The desk delivers more than the standard requires on both travel and load capacity.

There are 60 color/size combinations, and the desk is available in both 2 and 3 leg configurations.

The foot has a unique and thorough design that contributes to moving the visual expression from fixture to furniture.
The design has been around for some years and it just gets better.

The series is is the second most expensive in our program.
Design and performance cost a little more, but the value is there.

501-88 | Two in one

Bench or double tables are perfect for offices with focus on team-work and close daily cooperation. Workers can still set their own desk height, but feel part of the team with a bench desk setup.

The concept has 3 advantages:

With this desk set-up cleaning under desks is very easy and the desks never have to be moved around to access the floor under the desks. Less time spent cleaning an office is always a plus.

Cable management is simple, and all cables can be distributed from the center cable tray to different workstations. And most importantly, kept off the floor.
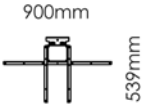

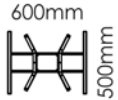

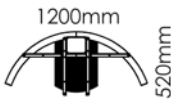

It is easier to maintain the aesthetic lines of a room. Many tables with many heights can make a room seem cluttered. This is minimized with double tables and the effect is enhanced with the use of separation screens.

General information

STRENGTH AND STABILITY

Stability means everything when you're choosing a desk. Every height adjustable desk from ConSet is made with quality materials and meet both EU and Danish working-environment demands for a flexible and ergonomic workplace.

A height adjustable desk must work everyday and be easy to use for everyone. You can place your office equipment anywhere on a ConSet desk, and it will lift evenly and safely, even if the load is not loaded evenly. This unbeatable dependability is due to ConSet's one-motor-system. The operation is simple, no unnecessary complexity, just push the arrows for up or down on the user panel.

The total load on the desk frame must always be within the maximum working load that is specified for each ConSet product.

ONE MOTOR THAT DOES IT ALL

The one motor system and the simple mechanics that surround it, is the heart of a ConSet height adjustable desk. It ensures calm and gentle movements when you wish to move the table up or down and it ensures that the tabletop is always evenly adjusted.

• Real mechanics
• Real lifting capacity
• Less use of electronics
• Improved product lifetime
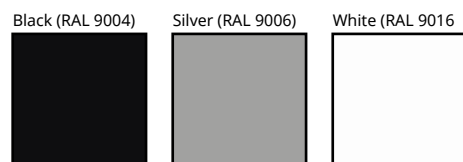

WORKING ENVIRONMENT

A ConSet desk will improve ergonomics for its users – and hopefully improve job satisfaction.

All ConSet tabletops are low emission E0(EN 717-1), so the formaldehyde emission is as small as possible, and poses no risk at all to users of the desk.
ConSet desks also have Clean Air GOLD certification.

CLIMATE CONCOIOUSNESS

At Conset we know it is important to minimize environmental impacts. We want to take responsibility for ensuring that our products are made respecting the environment. We do this in several ways:

• Life cycle assessment (LCA), in accordance with EN14040, EN14044 and EN14071 as a tool for targeted qualified improvements.
• CO_2 emission calculations on all models.
• All electronic equipment meets RoHS framework for the reduction of hazardous substances in electronics.
• Through Elretur(Denmark) we ensure that electronic waste is managed environmentally through WEEE directive.
• The EUTR(EU timber regulation) is the law of the EU and will later be replaced by EUDR. ConSet wood products that are not imported, exported to the EU are not treated differently.

CE-MARKING AND PRODUCT APPROVALS

All ConSet height adjustable desk frames are CE marked in collaboration with the Technological institute in Denmark. CE-marking ensures that the producer has considered all security risks.

• EN 527-1/2: Dimensions / mechanical safety requirements methods of test for the determination of Stability and strength of the structure.
• DS/EN 12720-21-22: Furniture assessment of surface resistance to cold liquids wet and dry heats.

ConSet - A BRAND FROM SCANDINAVIA

ConSet was founded in 2000 in Denmark (Scandinavia) with the basic philosophy that ergonomics should not be expensive. We began to develop and manufacture high quality, electric height adjustable desk and made them affordable so more people could experience the benefits of sit-stand desks. The company has succeeded well and now has distribution and subsidiaries throughout the world.
